

SET YOUR THERMOSTAT TO SAVE ENERGY

Obsessively. Relentlessly

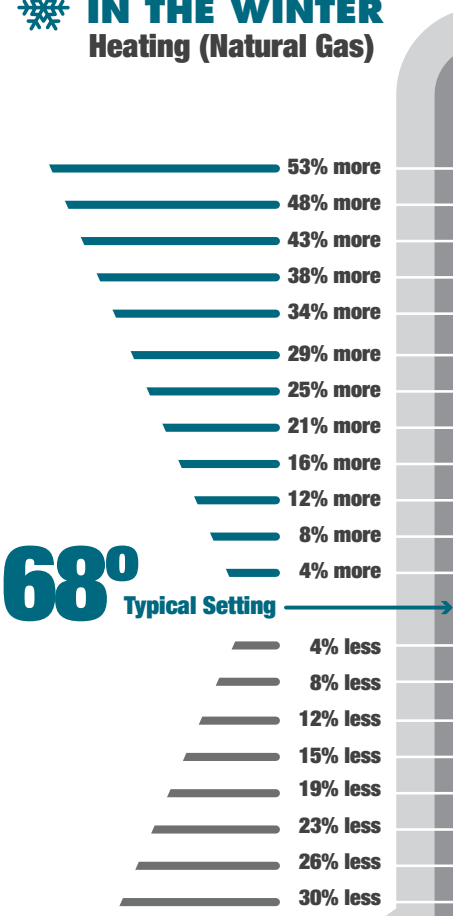

**At Your
Service**

DID YOU KNOW THAT YOU CAN REDUCE YOUR ENERGY USE SIMPLY BY ADJUSTING THE TEMPERATURE IN YOUR HOME OR BUSINESS?

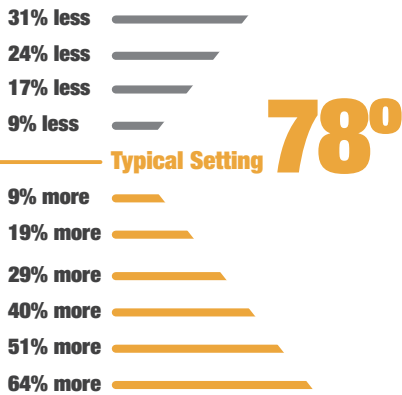

This chart illustrates the approximate change in energy consumption that may result from adjusting your furnace setting above or below 68 degrees and air conditioner setting above or below 78 degrees.

IN THE WINTER Heating (Natural Gas)

IN THE SUMMER Cooling (Electricity)

This chart is based on:

- > Indoor temperature maintained 24 hours/day
- > MidAmerican Energy service area weather data

Are you shopping for a new furnace or air conditioner? Look for the ENERGY STAR® to find the most energy-efficient appliances. Learn more about saving energy for your own home or business at MidAmericanEnergy.com/ee
